

# **Weavenn reveals its new fulfillment service for e-commerce marketplace players!**

Weavenn, the joint venture created by Fnac Darty and Ceva Logistics, has launched its new e-commerce logistics service, marking a decisive step in the company's development. This event is the first step in realizing our ambition to meet the needs of e-commerce marketplace players by offering a complete range of innovative and relevant solutions.

This first service, which enables marketplace sellers to delegate the storage of their products, as well as the preparation and dispatch of their orders, has been operational since May 22, 2024. From the outset, our aim has been to guarantee our customers impeccable quality of service. Weavenn's teams were therefore fully mobilized at the Compans warehouse to ensure that the first orders were processed under the best possible conditions.

Thanks to our e-commerce logistics service, we enable sellers to concentrate on their core business, while benefiting from high-performance logistics and quality customer service. End customers benefit from an optimal shopping experience, with short delivery times and accurate order tracking. The result is a sales boost for our customers!

With this successful launch, Weavenn has laid a solid foundation for its e-commerce logistics business. Weavenn is now ready to expand its range of services and strengthen its position in the e-commerce marketplace market. Weavenn's teams are more than ever mobilized to meet our customers' needs and offer them innovative and high-performance solutions.
